Stone Age Food

More than 5000 years ago, in the age of dirt, Stone Age people lived in Britain. They hunt and gathered a variety of food so they were known as the hunt-gatherers.

What did Stone Age People eat?

Stone Age People hunt and ate wild mammals and fish and they also ate cats and they kept pigs they went hunting for meat they eat strawberries in the jungle and mushrooms and fishing in the sea and some seeds and nuts and Eels and other sea life.

How Stone Age Gather their food?

Hunting they use spears
wally mammoth and wolf
pig and fishing in sea
gathered the berries and they
gathered the berries, strawberry
and Nut and honey.

Stone Age people hunt food and they children gather and they use the women keep the things
skinning together and drawing in the wall.

How did they cook their food?

Stone Age people cook their food middle of the cave some times in outside and they cook on the stew and they skin they animal after cook and with hot berry they make a soup and they also make food with sticks.

The Stone Age people cooking their food.
